Marks: 999/1100

Muslim Public Girls Higher Secondary School Peoples Colony Mumtazabad 2019 – 2021 | Multan, Pakistan
Matriculation
Marks:1096/1100

PROJECTS

Nexora Tech – Business Website, *Web Development Project* 07/2026
Technologies: Vite, React.js, JavaScript, Tailwind CSS, Supabase, Vercel.
Developed a modern, responsive business website with an intuitive user interface, smooth animations, and optimized performance. Built the frontend using React.js and Vite, while integrating Supabase for backend services, database management, and dynamic content. Ensured a responsive, user-friendly experience across all devices.
Live Demo: https://nexora-tech-five.vercel.app/

Online Class App, *Mobile Application Project* 02/2026 – 05/2026
Developed a mobile app similar to online meeting platforms, enabling users to join virtual classes and interact in real time. Learned basic concepts of mobile app development and user interaction.

Music Web Application, *Web Development Project* 09/2025 – 01/2026
Created a web-based music application with features like browsing and playing songs. Focused on basic UI design and functionality

Library Management System (LMS), *DBMS Project* 09/2024 – 01/2025
Developed a database-based system to manage library records, including book details, issuing, and returning. Applied DBMS concepts for data storage,retrieval, and management.
